

Rain Harvesting System

Following points have been made for rain harvesting in the campus. The Rainwater harvesting pit of simply involves the collection of water from surface on which rain falls, and subsequently storing this water for later use such as, the water is treated and recycled for reuse for horticultural activities.

Following points have been made for rain harvesting in the campus :--

S.NO	LOCATION	NO.
1	Medical Building	1
2	Dental Building	1
3	Godavri& Narmada Hostel	2
4	Paramedical Building	1
5	C.V Raman	1
6	Hospital Building	2
7	A Block	2
8	Kanchanjhangha	1
9	E Block	1
	Total	12
